**to keep
you warm
this winter**

HSS has over 18,000 heaters to help keep you and your business warm this winter including a range of Direct, Indirect, Radiant, Site/Office and Fan Heaters. So whatever your heating need, HSS can help keep you warm. Visit our online heating guide at www.hss.com/heat or see the back page of this leaflet for more information and to help you decide which heater is best for you.

Infra-Red Heater

Recommended for offices, shops, hospitals and other 'clean' areas, these stylish heaters provide instant, localised fume free warmth.

Retail Fan Heater

The Retail Fan Heater is ideal for use in retail outlets, garages, workshops and building sites. Safety features of this Retail Fan include a tilt sensor and an overheating thermostat.

Radiator Heater

These highly cost-effective and efficient heaters have been especially designed for use in heating offices, site huts and domestic rooms.

LPG Blower Heater

These heaters are perfect for providing large volumes of warm air in environments such as warehouses, factories and halls. Direct heaters are most suitable in ventilated areas, as the heating process adds moisture to the air during combustion.

57kW Heater

For heating large spaces in factories, workshops and other areas, this fully enclosed flame heater produces 57kW of heat per hour. Exhaust gases can be safely ducted away through 100mm ducting or can be added to the heat output to achieve 100 % efficiency.

HSS Sells Gas Tool

HSS supply a complete range of Propane, Butane and Patio Gas in a range of cylinder sizes.

**Better

**to light
your site
this winter**

Lighting at work is essential for the health and safety of everyone in the workplace. HSS Hire offers a large selection of portable lighting solutions to ensure that your chosen location is always fully illuminated. Choose from a single unit or combination of different lighting towers; many equipped with a built-in generator to produce clear, brilliant light. Visit our lighting guide at www.hss.com/lighting for more information.

Lighting Towers

Providing up to four times the light capability of traditional tungsten bulbs, this road towable lighting tower features four 1000W metal halide bulbs to produce bright, white light for a variety of applications.

Site Light

This new innovation is exclusive to HSS and produces 1600W of metal halide, bright white light. It is ideal for lighting construction sites or outdoor events. The Event Light is road towable and features 6 adjustable light heads.

Mast Floodlights

Twin floodlights, mounted on a 6 metre (20') telescopic tripod mast.

Telescopic Floodlights

Providing the light you need to work by over a large area, these tripod mounted, fully enclosed, floods make excellent site lights.

Festoon Lights

For general, low-level on-site lighting, festoon lights are the traditional solution. Simply string them out along scaffolding, fencing or trees.

Stand Floodlights

Perfect for illuminating awkward areas and tight spaces, these powerful fully enclosed floodlights can be used either free standing or hand-held.

**Better

**to power your
business this
winter**

HSS Hire has the generators to power you through the winter. Fuel efficient and with a variety of voltage sizes to choose from, each generator features multiple outlet points to manage a variety of lighting, sound and other energy requirements.

**2.5kVA Portable
Petrol**

Perfect for providing on-site electricity for lighting and small power tools, this useful little generator is so portable it fits into the boot of most cars.

**2.6kVA Diesel
Generator**

The wheelmounted Hawk 2.6kVA Diesel Generator supplies both 110V or 240V portable power on site, for small tools and lighting equipment. It can run for 3 hours at full load and is EU noise compliant.

3kVA Generator

Ideal for powering site tools and portable lighting. Fitted with anti-ballast plate to stop the set sinking into the ballast, also fitted with a long run fuel tank.

**10kVA Silenced
Diesel**

Producing over 7kVA of continuous power, this barrow mounted generator has a choice of seven 110/240V outlets. This makes it ideal for powering a variety of tools and lighting equipment on large sites.

**20kVA Silenced
Diesel**

Supplying 110V, 240V and 415V (3 phase) simultaneous power, this 20kVA silenced generator delivers continuous high power to meet tough on-site demands. It has multi-socket outputs and a hard wire facility.

**60kVA Super
Silenced Diesel**

Combining super high performance with road-tow portability, this silenced diesel generator supplies 240V and 415V (3-phase) continuous power.

**to keep you
dry this
winter**

HSS has an extensive range of portable dryers, warm air dryers and pump dehumidifiers that are suitable for removing most forms of moisture in a room, whether its damp or just excess moisture in the air.

52Ltr Industrial Dryer

This is a professional dehumidifier with an extra high capacity of up to 52 litres in 24 hours. It is easily portable with large wheels and can be used in rooms up to 400m³

25Ltr Industrial Building Dryer

Dry out damp buildings quickly and efficiently before rot and fungus can take hold. Invaluable in the aftermath of floods and burst pipes, this dryer can also be used as a dehumidifier to reduce condensation after plastering or decorating.

17Ltr Warm Air Dryer

This portable dryer features a powerful 2750 watt built-in heater which speeds up the drying process by increasing the air temperature.

10Ltr Portable Dryer

Perfect for drying out rooms after redecorating, replastering and repairs to minor leaks, this portable de-humidifier is ideally suited for the home, site or office.

Pump Dehumidifier

No more checking water levels and emptying water containers with this new building dryer. The inbuilt pump automatically purges water through the supplied hose direct into a sink or drain, over 12m away.

Floor & Carpet Dryer

Drying out carpets after leaks and floods is easy with this powerful three-speed, heavy-duty dryer. Just lift one edge of the carpet, insert the nozzle and switch on! It works on hard floors, by simply directing the airflow over the wet surface.
