

Plug the unit into its power supply and switch the supply ON.

To switch the fan ON, turn the ON / OFF switch clockwise. To switch the fan OFF, turn the switch anti-clockwise.

Do remember that the airflow will disturb dust, litter and possibly someone's carefully prepared paper work, so... think before you switch ON!

EQUIPMENT CARE

If the model of cooling fan is not giving sufficient airflow, you may have to hire additional fans. Contact your local HSS Hire Shop for advice.

Keep the equipment clean - you will find this less of a chore if you clean it regularly, rather than wait until the end of the hire period.

When not in use, store the equipment somewhere clean, dry and safe from thieves. **FINISHING OFF**

Switch the fan OFF, unplug it from the power supply and neatly coil its power supply cable.

Give the unit a final clean up ready for return, to your local HSS Hire Shop.

Warehouse Fan

A powerful, large capacity cooling fan, ideal for warehouse and workshop situations.

Code 56892

GENERAL SAFETY

For advice on the safety and suitability of this equipment **contact your local HSS Hire Shop.**

This equipment should be used by an able bodied, competent adult who has read and understood these instructions. Anyone with either a temporary or permanent disability, should seek expert advice before using it.

Keep children, animals and bystanders away from the machine. Cordon off a NO GO area using cones and either barriers or tape, available for hire from your local HSS Hire Shop.

  **Never use this equipment if you are ill, feeling tired, or under the influence of alcohol or drugs.**

 **This equipment is heavy (75kg), never attempt to lift it on your own, always get help.**

Never use the equipment if highly flammable vapours – petrol or paint thinner fumes for example – are present.

Never carry or pull the equipment by its flex or hoses.

DO NOT use this equipment in an explosive atmosphere.

Never lean over the fan or obstruct its airflow. Leave a 900mm gap all round to let air circulate.

Avoid loose garments and jewellery that could catch in moving parts.

Make sure you know how to switch this machine OFF before you switch it ON in case you get into difficulty.

Check the condition of the equipment before use. If it shows signs of damage or excessive wear, return it to your local HSS Hire Shop.

Ensure the guards are correctly fitted and secure before starting the machine.

ELECTRICAL SAFETY

The HSS Warehouse Fan plugs into a standard 240V 13amp-power socket. However, **110V models** (with a round yellow plug) **must be provided with a suitable 110V generated supply,** or powered from the mains via a suitable 110V transformer.

If the equipment fails, or if its power supply cable or plug becomes damaged, return it. Never try to repair it yourself.

Keep cables out of harm's way, and clear of any walk way.

Extension leads should be fully unwound and loosely coiled, away from the equipment. Never run them through water, over sharp edges or where they could trip someone.

Warehouse Fan

Keep the equipment dry, using electrical equipment in very damp or wet conditions can be dangerous.

 **To reduce the risk of electric shock, always use a suitable RCD** (Residual Current-Operated Device) available from your local HSS Hire Shop. Or power 240V (not 110V) equipment from a mains circuit with a built in RCD

Ensure the machine and power socket are switched OFF before plugging into the power supply.

GETTING STARTED

Set the unit up on a firm, level surface where air from the fan can circulate freely through the space and where motor noise will not be a nuisance.

Choose the direction of the airflow carefully, avoid blowing air towards dusty areas or where paperwork will be disturbed.
